Masks, Face Shields and Gloves. Oh My!

When I am at the store or an appointment, I will see people wearing protective equipment.
Protective equipment keeps people safe from germs.

One piece of protective equipment is a mask.
I might see kids, adults, teachers, store workers, grandparents, doctors and nurses wear masks.

Some people wear bandanas, scarves or other face coverings instead of a mask.
Another thing I might see is a face shield. This is a clear, plastic shield that covers someone's face.

Usually, a doctor, nurse or dentist will wear a face shield.
A face shield can protect from coughs and sneezes.

Gloves can also protect people from germs.
I can try to remember that behind the protective equipment are people with noses and mouths.

They might even be smiling at me!
I will get used to seeing more protective equipment.

Masks, face coverings, face shields and gloves are just some of the things that help protect from germs. It's okay!
Thank you for purchasing this activity from my store! I hope you find these materials as useful as I have in my classroom. Be sure to come back for newly added products!

This product is free, and I give you permission to distribute, copy and use as you wish. When able, give credit to Autism Little Learners or Tara Tuchel and refer people to my website:  www.autismlittlelearners.com
